PROFESSIONAL SUMMARY

Full-Stack Developer experienced designing, developing, and deploying scalable front-end and back-end web applications using Java, Spring Boot, React.js, Next.js, Node.js, and the MERN Stack. Skilled in RESTful APIs, database architecture, AI integration (Google Gemini), and JWT-based authentication with role-based access control. Collaborates with cross-functional Agile teams to optimize applications for speed, scalability, security, and performance. MCA candidate at Bharati Vidyapeeth (IMED), Pune. 8.44 CGPA in BCA.

TECHNICAL SKILLS

- **Programming Languages:** Java (Core Java), JavaScript (ES6+), SQL.
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **Backend Development:** Spring Boot, Node.js, Express.js, REST API Design.
- **Databases:** MySQL, MongoDB, Firebase, MongoDB Aggregation Pipelines.
- **DevOps & Tools:** Docker, Git, GitHub, Postman, Agile/Scrum.
- **Security:** JWT Authentication, Role-Based Access Control (RBAC), End-to-End Encryption.
- **AI Integration:** Google Gemini API, Prompt Engineering, AI Chatbot Development.
- **Core Competencies:** Scalable Web Application Design, Front-End & Back-End Development, Database Architecture, Collaboration with Designers & Product Stakeholders, Performance & Scalability Optimization, Troubleshooting & Debugging.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Intern | Zidio Development

Jun 2025 – Aug 2025

- Designed, developed, and tested 10+ RESTful API endpoints using Java, Spring Boot, and JPA/Hibernate, delivering features across the full development lifecycle within a 5-member Agile team using 2-week sprint cycles.
- Optimized database queries via JPA/Hibernate to reduce redundant calls and improve API response times across microservice components.
- Troubleshoot, debugged, and enhanced existing modules by identifying and resolving 20+ bugs through systematic testing, improving application stability ahead of internal releases.

Full Stack Developer Trainee | LoyaNox Development

Jun 2026 – Present

- Designed and built 8+ REST API endpoints and database architecture powering core features of full-stack web applications using Next.js, React.js, Node.js, and MongoDB, with JWT-secured authentication.
- Integrated Google Gemini AI APIs to automate 3+ manual workflows, including query handling and content suggestions, reducing manual effort and improving user engagement.
- Optimized MongoDB aggregation pipelines across core queries to improve data retrieval efficiency, and collaborated with developers and product stakeholders to troubleshoot and enhance application performance.

PROJECTS

InternHub – AI-Powered Internship Management System

[LIVE](#) | [GITHUB](#)

React.js, Node.js, MongoDB, JWT, Tailwind CSS, Google Gemini AI, Jitsi Meet API

- Built a role-based internship management platform supporting 3 user roles (Admin, Intern, Reviewer) with 12+ REST API endpoints covering task management, attendance tracking, automated reports, and notifications.
- Designed responsive Admin and Intern dashboards with real-time data updates, an AI chatbot for common queries, and secure JWT-based authentication.
- Optimized MongoDB queries and indexing to improve API response times for real-time dashboard updates.

DevHub – GitHub Clone Platform

[LIVE](#) | [GITHUB](#)

Next.js, React.js, Spring Boot, MongoDB, Tailwind CSS, JWT

- Developed a GitHub-inspired repository management platform with 15+ REST API endpoints supporting CRUD operations, file handling, and user profile management, secured with JWT authentication.
- Built a fully responsive user interface supporting repository creation, browsing, and management across desktop and mobile viewports.
- Improved API response times for repository and file-handling endpoints through query optimization and pagination.

AI Form Builder – Dynamic Form Generation Platform

[LIVE](#) | [GITHUB](#)

Next.js, React.js, Node.js, MongoDB, Google Gemini AI, Tailwind CSS

- Built an AI-powered form builder that generates dynamic, customizable forms from natural-language prompts using the Google Gemini API, with drag-and-drop field editing and validation.
- Implemented REST APIs for form creation, response collection, and MongoDB-backed storage, with a responsive interface for building and previewing forms in real time.

CERTIFICATIONS

- Full Stack Java Development — Symbiosis & Capgemini
- AI and Employability Skills — Magic Bus (Supported by Infosys Foundation)
- Prompt Engineering with GitHub Copilot — Simplilearn SkillUp (Powered by Microsoft)

EDUCATION

Master of Computer Applications (MCA) — Bharati Vidyapeeth (IMED), Pune | 2025 – 2027

Bachelor of Computer Applications (BCA) — Shivaji University, Kolhapur | CGPA: 8.44
